## WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Institutional Class	\$74	0.72%

## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

Over the period of 8/31/23 thru 8/31/24 the Municipal Bond Market continued to recover from the prior 18 months of record breaking outflows. Although the last quarter of 2023 still experienced redemptions with a trailing four week average of approximately \$1Billion, the new calendar year saw increasing interest and demand for the then much higher levels of tax free yields available in the asset class. For the remaining reporting period, municipal market flows turned positive on a four week trailing period, averaging roughly \$750Million each month through August 2024. This was further evidenced by the subsequent increases in bond prices as AAA yields declined 41bps-18bps-29bps-25bps (5yr-10yr-20yr-30yr) and A rated yields declined 45bps-34bps-52bps-46bps (5yr-10yr-20yr-30yr). Additionally, credit outperformed high grade paper with spreads tightened upwards of 75bps on the short end of the curve (5yr) and 65 bps on the long end (22+yr). The municipal bond market continues to provide opportunities to invest in attractive tax exempt yields, albeit at lower levels than a year ago but still quite attractive relative to the prior low rate environment experienced in the 2010s and most of the 2020s thus far.
